

EZQR

How to Make a QR Code for Google Maps

1

Find your place in Google Maps

Open the Google Maps app or maps.google.com and search for your business, venue, or address so the correct pin is selected.

2

Copy the share link

Tap or click Share, then choose "Copy link" to get a maps.app.goo.gl or google.com/maps URL for the location.

3

Paste it into EZQR

Paste the link into EZQR and the QR code preview generates instantly.

4

Download and test

Download as PNG, JPG, or SVG, then scan with your phone camera to confirm it opens the pin with a Directions button.
