# How to Make a QR Code for Your Salon

**1**

## Pick what clients should open

Online booking or rebooking, your service and price menu, reviews, or your Instagram.

**2**

## Create a dynamic QR code in EZQR

Dynamic so you can update prices and services from your dashboard without reprinting the sign at the chair.

**3**

## Place it where clients wait

The front desk, the station mirror, and the door, with a caption like 'Scan to book your next visit.'

**4**

## Test on both phones

Scan from the chair on an iPhone and an Android and run through booking before putting the code out.

**5**

## Keep it current and tracked

Reprint the code for a new promo or gift-card page, and see which placements get scanned most.
